

# Arace Supply - Slotted Strut Channel

## Application:

Our hot-dipped slotted strut channel is specifically designed for supporting and mounting electrical systems. Made from high-quality steel and hot-dip galvanized for superior corrosion resistance, this strut channel is ideal for use in both indoor and outdoor electrical installations. The pre-drilled slots provide flexibility and ease during installation, allowing for precise adjustment to accommodate various electrical configurations. With its robust construction, our hot-dipped slotted strut channel ensures reliable support for conduit, cable trays, and other electrical components.

1-5/8"

## Standards:

- Steel conforms to ASTM A1011 SS GR 33
- Finish conforms to ASTM A123
- Standard Length of 20' with 10' also available
- Loading bearing information for beam or column is also available

13/16"

Gauge	Height	Width	Total Weight	Type of Hole	Length
14	1-5/8"	1-5/8"	11.9	Standard	10'
14	1-5/8"	1-5/8"	23.8	Standard	20'
14	13/16"	1-5/8"	9.1	Standard	10'
14	13/16"	1-5/8"	18.2	Standard	20'
