

Arace Supply - Nonmetallic PVC Conduit

Schedule 40

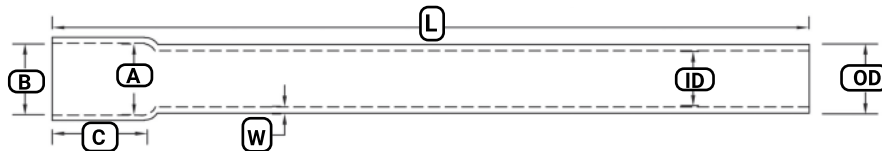

Application:

Our nonmetallic PVC Schedule 40 conduit is an ideal choice for protecting and routing electrical wiring in a wide range of applications. Constructed from durable PVC, this conduit offers reliable performance with easy installation. Designed for both above-ground and underground use, its corrosion-resistant properties ensure long-lasting protection in various environments. Whether you're working on residential or light commercial projects, our Schedule 40 conduit delivers dependable and cost-effective results.

Standards:

- ETL Listed
- Conforms to UL651 and NEMA TC-2
- Rated for 90-Degree C conductors
- UV Protection
- Standard 10' lengths, 20' available on request
